MAP

Purpose

**With its Outstanding Technical Capabilities
and Extensive Experience of ICT Services,
CORE CORPORATION Contributes
to Creating Sustainable Societies**

Established in 1969,
we have been developing and expanding our businesses
in a variety of fields
by focusing on providing customer-oriented services
as an independent, nationwide ICT corporate group.

For the coming era when social issues are
becoming more apparent, and measures
against diverse risks should be taken,
we make sure to make the most of
our technical capabilities and the experience
we have gained so far,
and contribute to creating sustainable societies
as a company that co-creates value together
with its customers.

Vision

Vision
2026

Social Solution Maker

Realizing SX (Sustainability Transformation)
as a Company Solving Social Issues with ICTs and Co-creating Value

**We solve problems in society
as a “Social Solution Maker” which co-create new value.**

We, CORE Group, make sure to co-create new value with our customers by providing uniform, high-quality products and services, making the most of the strengths of our decentralised company system.

With the environment surrounding our societies greatly changing, there is a critical need to achieve transformation, such as improving efficiency and energy-savings, through the use of ICT. In the global community, companies are expected to make efforts to solve various social challenges identified in the Sustainable Development Goals (SDGs) set out by the United Nations.

In the midst of these changes, our group has established Vision2026, as a company that solves social issues and co-creates new value with its customers.

With three core businesses (Future Society Solutions, Industrial Technology Solutions, and Customer Operations Integration), we will realise SX through co-creating new value to make societies sustainable.

Representative Director and
President Executive Officer

Vision 2026

The 14th Medium-term Management Plan of CORE Group

(From FY2023 ending March, 2024 to FY2025 ending March, 2026)

Business Strategies

Providing uniform services to our customers across Japan

Growth Engines

Future Society Solutions Business

Business to create high value-added solutions to future social challenges, such as the environment and life infrastructure, by utilising our strengths

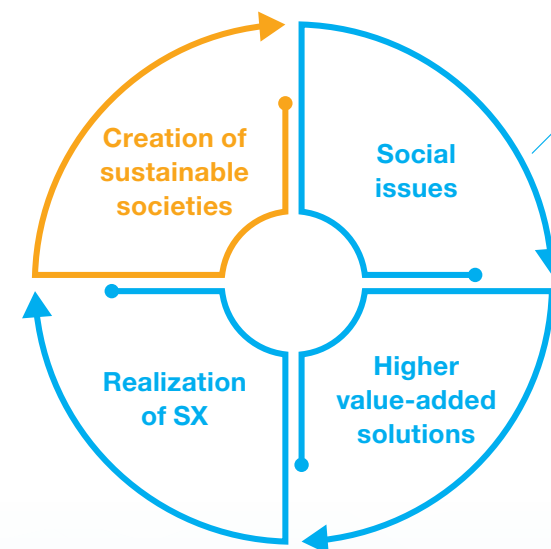

Industrial Technology Solutions Business

Business to provide solutions, with specialised ICT such as IoT (AI) and GNSS, to our customers' business challenges

Business Source

Customer Operations Integration Business

Business to build total ICT services for customers' operations, utilising our business knowledge and know-how

CORE SX Ecosystem: Diving deep into social issues

A mechanism to accelerate the creation of higher value-added solutions by combining our own solutions and technologies with the business know-how, and development and technical capabilities, which we have enhanced over the years to solve social problems

CORE SX Framework: Creating new value

A framework to visualize in-depth social issues and standardize the way of creating high value-added solutions by setting up multiple processes and checkpoints to operate, when creating solutions

* SX: Sustainability Transformation

Social Solution Maker

Solving social issues with ICT

A company co-creating value with its customers

Human Resource Strategies

SX personnel who can standarize social issues and create highly added value

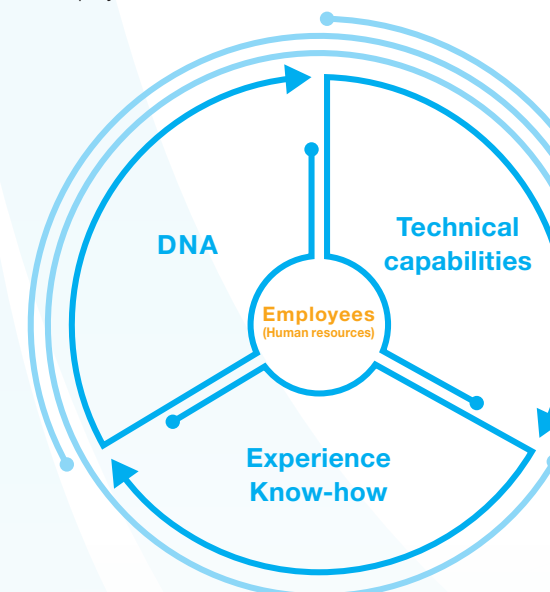

- Improving problem-solving capability through upskilling

Medical

Providing an integrated system of medical and nursing care to show at a glance what has been done in a day

Energy

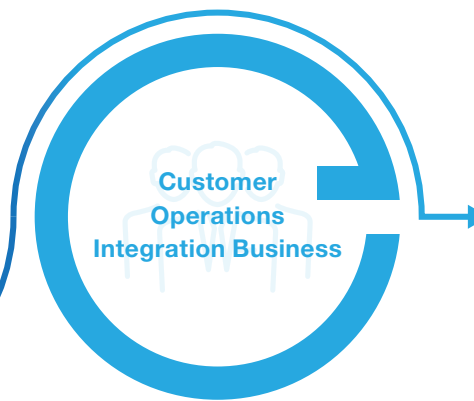

Contributing to realization of a sustainable society through energy solutions

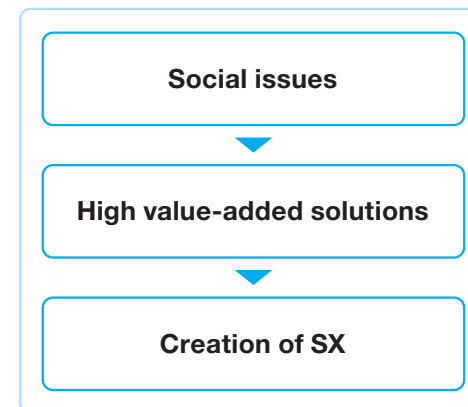

Future Society Solutions Business

Industrial Technology Solutions Business

Customer Operations Integration Business

With New Segments, We Make Efforts to Create Sustainable Societies and Achieve our Medium- to Long-term Corporate Growth

As values diversify and industrial structures and business environments are drastically changing, companies are required to participate in the realisation of sustainable societies. In order to synchronise the challenges of society and industrial technology and realise SX, we, the CORE Group, have reorganised our business segments.

Now we have the Future Society Solutions Business and Industrial Technology Solutions Business segments to ensure our competitiveness, and the Customer Operations Integration Business segment to deal with challenges our customers are facing.

To strengthen our business management for SX, we now aim to explore defined markets and increase our corporate value.

Industrial Technology Solutions Business

Growth Engines

Providing solutions, with specialised ICT such as IoT (AI) and GNSS, to our customers' business challenges

Business description

IoT(AI)

Industrial innovation from sensor to cloud with IoT

Media

Video solutions to convey accurate information and various emotions through text and images

Space Tech

High-Precision Positioning and Time Synchronization Solutions Utilizing Specialized Technologies for Space, Positioning, and Satellite Applications. Contributing to a more comfortable and efficient society by providing comprehensive solutions encompassing GNSS and drone technologies.
